

# AGRI-FOOD Process

## PROMOTING CLEANING AND LIMITING RETENTION AREAS

A unique expertise in the manufacture of flexible high-speed doors, doors to meet the requirements and hygiene regulations of the agri-food industry

## High-speed doors to meet the requirements of the agri-food industry

Maviflex high-speed doors for the agri-food industry have been designed and optimised for easy cleaning and to avoid retention areas in work areas.

Their self-supporting structure, also available in stainless steel, has been designed to take up very little space.

Maviflex solutions are designed to compartmentalise areas with temperature differences. For environments with higher fluctuations, the insulated version provides even better insulation and real energy savings.

Discover the high-speed doors **MAVIONE**® and **MAVIROLL**®

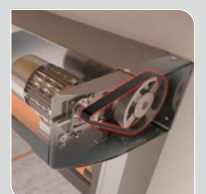

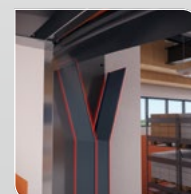

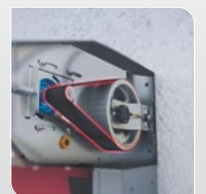

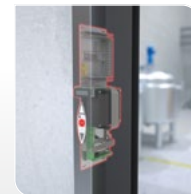

## The benefits for the agri-food industry

- Stainless steel structure.
- Antistatic polyethylene guides: prevent dust retention and make cleaning process easier.
- Belt drive system: eliminates the need for a gearbox and prevents oil leaks in the production environment.
- Optimised cable routing
- Self-supporting structure: no stress on supports.
- Enclosed structure with motor integrated into the canopy
- Door and accessories comply with APSAD Standard DI4A.

### Available on the MaviROLL door:

- Integrated IP66 waterproof control box: more available space, eliminates the need for a remote control box and eliminates all visible cables in the activity zone.
- Triple-insulated curtain for specific areas with large temperature fluctuations ( $U = 2.7 \text{ W/m}^2$ ).
- SafeTIME 3-cell safety system: no safety device built into the curtain

## IP66 WATERPROOF

integrated control box

**Worldwide exclusivity for MAVIFLEX  
to be discovered now !**

- Water resistance and moist environments
- Resistance to shocks and aggressive environments
- Certified by CETIM
- Integrated in the left upright
- No visible cables between the control box and the motor
- APSAD-D14 compliance

Available exclusively on

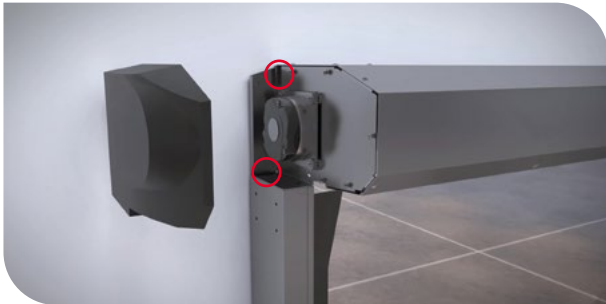

# MAVIROLL®

## An optimized installation process

### Cable routing inside the door

MaviROLL

MaviONE

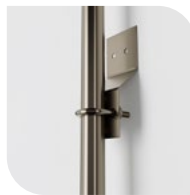

## Installation accessories

## APSAD standard D14A

### 3 installation kits for remote control box

Cable tray installation kit

Agro Process installation kit

Stainless steel wire installation kit

#### Included in each installation kit:

- Silicone cartridge
- Knock-in dowels
- Counter plate washers
- Detectable blue collar
- Stainless steel threaded rod
- POM socket
- Washers for socket
- Bulkhead connection
- Stainless steel screws
